

MALLIKARJUN GALATAGI

"Java Full Stack Developer" | Ph. No: 8792260928 | [Personal Portfolio](#)
mallikarjungalatagi@gmail.com | <https://github.com/MallikarjunGalatagi> | www.linkedin.com/in/mallikarjun-galatagi

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience in designing and developing full-stack web applications using Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, and JavaScript. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, MVC architecture, DAO design pattern, and SQL. Experienced in building scalable multi-module applications using Eclipse, Apache Tomcat, Maven, and Git. Seeking a Software Developer role to contribute technical and problem-solving skills.

SKILLS

- **Programming Languages:** Java
- **Frontend Technologies:** HTML5, CSS3, JavaScript
- **Backend Technologies:** JSP, Servlets, JDBC
- **Databases:** MySQL
- **Core Concepts:** CRUD Operations, MVC Architecture, OOP, DAO Pattern, DSA
- **Tools & Platforms:** Eclipse, Apache Tomcat, VS Code, Git, GitHub
- **Professional Skills:** Communication Skills, Teamwork, Problem Solving, Critical Thinking

EXPERIENCE / INTERNSHIP

- Completed hands-on training in Java Full Stack Development with practical experience in building dynamic web applications.
- Developed web applications using Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, and JavaScript.
- Implemented CRUD operations, session management, and database connectivity using MVC architecture and the DAO design pattern.
- Used Eclipse IDE, Apache Tomcat, Maven, Git, and GitHub for development and deployment.

PROJECTS

Technologies: Java, JSP, Servlets, HTML, CSS, JavaScript, MySQL, JDBC, DAO, MVC, CRUD, Apache Tomcat, Maven.

1. Multispeciality Hospital Management System ([GitHub Repository](#) | [Project Demonstration](#))

- Built a full-stack multispeciality hospital management system with separate modules for Admin, Receptionist, Doctor, and Patient to manage hospital operations efficiently.
- Implemented role-based authentication, appointment management, and notification features.

2. Foodify - Online Food Delivery System ([GitHub Repository](#) | [Project Demonstration](#))

- Built a full-stack online food delivery system with separate modules for Admin, Customer, Restaurant Owner, and Delivery Partner.
- Implemented role-based authentication, restaurant management, shopping cart, order processing, and delivery tracking.

3. Fashion Hub E-commerce Web Application ([GitHub Repository](#) | [Project Demonstration](#))

- Built a full-stack fashion e-commerce web application with product browsing, user authentication, shopping cart, and order management features.
- Designed to provide a responsive, user-friendly, and efficient online shopping experience.

4. User Management System ([GitHub Repository](#) | [Project Demonstration](#))

- Built a web-based user management system with features like user registration, login authentication, profile management, and secure logout.
- Designed to provide secure and efficient user authentication and account management.

EDUCATION

- **Bachelors of Engineering** in Artificial intelligence and Data science, KLE CET, Chikodi (**CGPA: 8.13**) (2022-2026)
- **Pre University Education**, Govt PU College Majalatti (**75%**) (2020-2022)
