

MALLIKARJUN GALATAGI

“Java Full Stack Developer” | Ph. No: 8792260928

mallikarjungalatagi@gmail.com | <https://github.com/MallikarjunGalatagi> | www.linkedin.com/in/mallikarjun-galatagi

PROFESSIONAL SUMMARY

Java Full Stack Developer with hands-on experience building full-stack web applications using **Java, JSP, Servlets, JDBC, HTML, CSS, JavaScript** and **MySQL**. Working on **CRUD** operations, role-based authentication, and session management. Strong in **OOP, DSA**, and **MVC** architecture. Seeking a fresher Software Developer role to apply these skills in a production environment.

SKILLS

- **Programming Languages:** Java
- **Frontend Technologies:** HTML5, CSS, JavaScript
- **Backend Technologies:** JSP, Servlets, JDBC
- **Databases:** MySQL
- **Core Concepts:** CRUD Operations, MVC Architecture, Object-Oriented Programming, Data Structures and Algorithms (DSA)
- **Tools & Platforms:** Eclipse, Apache Tomcat, VS Code, Git, GitHub
- **Professional Skills:** Communication Skills, Teamwork, Problem Solving, Critical Thinking

EXPERIENCE / INTERNSHIP

Full Stack Development intern at TAP academy: Completed hands-on training in **Java Full Stack Development**, gaining practical experience in designing and developing dynamic web applications. Worked with **Java, JSP, Servlets, JDBC, MySQL, HTML, CSS, and JavaScript** to build and integrate frontend and backend components. Developed a strong understanding of **CRUD operations, database connectivity, session management, and form validation**, while using **Eclipse IDE, Apache Tomcat, GitHub** for application development and deployment.

PROJECTS

Technologies Used: Java, JSP, Servlets, HTML, CSS, JavaScript, MySQL, JDBC, Apache Tomcat, Maven.

1. Multispeciality Hospital Management System ([GitHub Repository](#) | [Project Demonstration](#))

- Developed a full-stack **multispeciality hospital management system** with separate modules for Admin, Receptionist, Doctor, and Patient to manage hospital operations efficiently.
- Implemented role-based authentication, appointment management, and notification features.

2. Foodify - Online Food Delivery System ([GitHub Repository](#) | [Project Demonstration](#))

- Developed a full-stack **food delivery system** with separate modules for Admin, Customer, Restaurant Owner, and Delivery Partner.
- Implemented role-based authentication, restaurant management, shopping cart, order processing, and delivery tracking.

3. Fashion Hub E-commerce Web Application ([GitHub Repository](#) | [Project Demonstration](#))

- Developed a full-stack **fashion e-commerce web application** with product browsing, user authentication, shopping cart, and order management features.
- Designed to provide a responsive, user-friendly, and efficient online shopping experience.

4. User Management System ([GitHub Repository](#) | [Project Demonstration](#))

- Developed a **web-based user management system** with features like user registration, login authentication, profile management, and secure logout.
- Designed to provide secure and efficient user authentication and account management.

EDUCATION

- **Bachelors of Engineering** in Artificial intelligence and Data science, KLE College of Engineering and Technology, Chikodi. (CGPA: 8.13) (77.32%) (2022-2026)
- **Pre University Education**, Govt PU College Majalatti (75%) (2020-2022)
- **SSLC SDVS' Kannada Medium Highschool**, Sankeshwar (88.96%) (2019-2020)
